

AMENDMENTS TO THE SPECIFICATION

Please further amend paragraph [0051] of the published application as follows:

– – Another embodiment of the present invention provides a molecule comprising V_H and V_L domains of amino acid sequences having SEQ ID NO: 104 and [[103]]93, which has specific affinity for FGFR1 and which blocks ligand-dependent activation of FGFR1, and the corresponding isolated nucleic acid molecules comprising polynucleotide sequences having SEQ ID NO: 75 and SEQ ID NO: 66. – –
